

FOR IMMEDIATE PUBLICATION

HM Document Solutions acquires two Xeikon SX30000 Digital Presses

Lier, Belgium, 02 June 2023 – Xeikon America, Inc. today announced that two of its flagship [Xeikon SX30000](#) digital printing presses have been purchased by [HM Document Solutions](#), a large full-service printing, mailing and digital services provider. The new machines will be installed shortly at HMDS' Pittsburgh, PA. and Jacksonville, FL. facilities.

Located in Jacksonville – HMDS's current Xeikon 9800 will be joined by a new Xeikon SX30000. Additionally, a second Xeikon SX30000 will be installed in HMDS' Pittsburgh facility. For this reason, HMDS particularly likes Xeikon's capability of high-speed printing on roll-fed synthetic media like Teslin®. "We've used Xeikon digital presses with exceptional results for more than a decade," said Ihar Liashko, Director, Strategic Operations, at HM Document Solutions. "As our business steadily grows, it was an easy decision to upgrade our current Xeikon presses to their top-of-the-line Xeikon SX30000."

The fast and efficient Xeikon SX30000 can deliver as many as 2,545 full-color 4/4 printed B2 sheets an hour (equivalent to 428 ppm A4) with lower setup costs than conventional technologies. Offering the widest range of substrate choices in this category, it prints on uncoated papers, digital coated papers in silk, gloss or matte and standard offset papers up to 350 gsm and synthetic media. The Xeikon SX30000 uses the new SIRIUS® toner, which is produced in a plant powered by 100% green energy. The print is fully de-inkable in existing waste streams.

"We are happy to play a part in HM Document Solutions' continued success," said Donna Covannon, Director of Marketing, Xeikon America, Inc. "A growing number of commercial print providers are acquiring the Xeikon SX30000, attracted by its many unique features."

PRESS RELEASE

ABOUT XEIKON

Xeikon, a division of Flint Group, is a long-standing leader and innovator in digital printing technology. Grounded in the principles of quality, flexibility and sustainability, Xeikon designs, develops and delivers digital colour presses for label and packaging applications as well as graphic arts and commercial printing. These printing machines work with different imaging technologies, open workflow software and application-specific consumables.

Xeikon is Flint Group's "Digital Printing Solutions" division for the leading global print consumables and solution provider to the packaging and print media industries. Flint Group develops and manufactures an extensive portfolio of consumables for the printing industry. These include a vast range of conventional and energy-curable inks and coatings, press room chemicals, and pigments and additives for use in inks and other colorant applications. The Flint Group is based in Luxembourg and employs around 5500 people. On a worldwide basis, the company is the number one or number two supplier in every major market segment it serves.
